

KNOW the Truth

Thursday 25th May 2017

Venue: The Barclay Room, The Metal Box Factory, 30 Great Guildford Street, London, SE1 0HS

Cylance believe that the only security tests that matter are those done in the real world, in real environments. Network Utilities is offering you the chance to attend an event to showcase the capabilities of Cylance PROTECT®.

In this session, Network Utilities and Cylance will offer you the chance to see Cylance in action for yourself and to understand how Cylance deals with Malware using new AI technology. We'll show Cylance against other commercial and freely available vendors, and show the predictive capabilities with a 6-month-old Cylance version against the same bits of malware (highlighting the need for no updates or internet connection).

Agenda

- 13:00** Light lunch, tea and coffee on arrival
