

PALO ALTO NETWORKS ULTIMATE TEST DRIVE

Date: 8th March 2017

Venue: Palo Alto Networks, 140 Leadenhall Street, London, EC3V 4QT
Session 1: Threat Prevention | Session 2: Advanced Endpoint Protection

You are welcome to join one or both sessions.

Agenda - Session 1, Threat Prevention

9:30 Coffee and Registration

Set up laptop and login

9:45 Welcome, Attendee Introductions & Overview of Palo Alto Networks Platform

Malcolm Orekoya, Senior Security Consultant, Network Utilities

10:45 Threat Prevention

Adam Legge, Security Consultant, Exclusive Networks
Malcolm Orekoya, Senior Security Consultant, Network Utilities

Hands on experience with Palo Alto Networks Next Generation enterprise security platform:

- Establish policies to prevent known threats
- Enable sandbox threat analysis using WildFire to control unknown malware – learn the value of detection and prevention

11:45 Coffee break

11:55 Threat Prevention

Adam Legge, Security Consultant, Exclusive Networks
Malcolm Orekoya, Senior Security Consultant, Network Utilities

Hands on experience with Palo Alto Networks Next Generation enterprise security platform:

- Configure decryption and URL filtering policies to manage high risk applications
- Enable policies to prevent unknown attacks & zero-day exploits on the endpoint with Traps

13:30 Lunch and Q&A

Agenda - Session 2, Advanced Endpoint Protection

14:00 Palo Alto Networks Traps Endpoint Protection

Dale Edwards, Security Consultant, Exclusive Networks
Malcolm Orekoya, Senior Security Consultant, Network Utilities

AV can no longer stop today's threats. Traps advanced endpoint protection is the only product offering that replaces AV with "multi-method prevention": a proprietary combination of malware and exploit prevention methods that pre-emptively block both known and unknown threats.

- Break down the sophisticated threat lifecycle
- Prevent successful execution of advanced attacks originating from executables, data files or network-based exploits
- Take on the roles of the targeted individual, attacker and security professional
- Understand the chain-like nature of exploits
- Experience the power of advanced execution control and cloud intelligence

16:00 Close

Notes: Please remember to bring your laptop for this hands on technical workshop and arrive promptly so you have plenty of time to set them up before we start at 9.45am.

Event Contact Kara Jenkinson, Marketing Executive, Network Utilities | 07980 241305 | kjenkinson@netutils.com

*Offer not applicable to existing Palo Alto Networks customers. The Ultimate Test Drive is only open to organisations who are new to Palo Alto Networks and with an eligible firewall project. Network Utilities has the right to refuse registration, on completion of the form we will contact you by email to confirm your place for this event.
